Year-over-year change vs the same month last year

Google Trends interest: actual and forecast

term

- caramel perfume
- chocolate perfume
- gourmand perfume
- vanilla perfume

Gourmand Rising: Google Trends for gourmand fragrance terms

Vanilla perfume is the most searched of the four terms. Its yearly average rose from about 8 in 2022 to about 45 in 2026, and its winter peak has grown every year (7, 17, 24, 35, 56). I treated the Sep 2026 spike, which hit all four terms, as a one-off. The forecast expects 2027 to cool to about 35 on average but stay well above 2022 levels, with Nov and Dec the highest months. Back test error: 19.6 vs 28.3 for “same as last year”. Google Trends shows relative interest, not sales.
